TIPS FOR success

ANSWER THE QUESTIONS - read carefully the description and criteria points of the category you are entering - You will be scored on each criteria point.

BE CLEAR - clear and simple submissions are easier for the judges to extract the relevant information from.

PROVIDE EVIDENCE - if the entry criteria asks for evidence then please show it clearly supported, wherever possible, by factual information.

BE CONCISE - for some awards the judges will have to read through a large number of entries in a limited time period. Be concise and relevant with the information you share in relation to each criteria point.

BE CURRENT - while we value the great contribution of the drainage industry over many years, the awards celebrate your successes of the last 12-months only.

ABOVE AND BEYOND - remember the awards reward excellence - that does not mean simply ticking the boxes - it means going above and beyond . You need demonstrate, with evidence, that you have done this.

NEVER ASSUME - while the judges all have relevant experience - they won't necessarily be expert in the different services provided by drainage contractors.

GOOD luck!
